From the moment I created my first simple page using HTML and CSS, I knew I have found my passion. Every new technology learned, and every new project accomplished instigates me to learn more and more. This is one of the characteristics that excites me about Web Design, the endless possibilities and the constant evolutions of the technology.

TECHNICAL EXPERIENCE

Portfolio Website (Ecommerce)
https://danpoliti.github.io/ecomm-store-project/

- Created a beautiful responsive portfolio website that simulates a ecommerce store using HTML, CSS, Javascript, React and Babel.

Project 2 (Recipe page)
https://danpoliti.github.io/recipe-project/

- A responsive recipe website created using HTML and CSS with the main goal of practice, explore and play with CSS Flex and Grid properties aiming to reach a seamless responsive effect.

Project 3 (Roll Dice API)
https://danpoliti.github.io/roll-dice-API/

- A simple HTML page to learn and practice how API works and how to connect to the page using javascript. For a better

Project 4 (Ghibli Movies API)
https://danpoliti.github.io/assigment-2-code-challenge/

- A simple HTML with a well tailored work using CSS and Javascript to retrieve data from the API. Also created a Contact Form using Firebase database.
